

Cortellis Competitive Intelligence

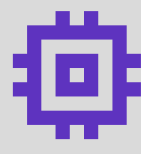

Stay a step ahead of your competitors

Leverage competitive intelligence spanning the entire drug development lifecycle

Gaining a competitive edge in drug development requires monitoring the current pipeline while keeping an eye to the future. Cortellis Competitive Intelligence delivers timely intelligence to survey the entire development landscape and provides comprehensive analysis to forecast trends, threats and opportunities.

Sales forecasts, pipeline and competitor data from discovery and preclinical through launch

Exclusive analytics that use statistical modeling and machine learning

The most information about the early phase (preclinical) pipeline and start-up companies

The most extensive drug pipeline and competitive database

Make critical portfolio decisions backed by accurate, comprehensive pipeline and competitive intelligence

Robust data

72K+
pipeline drug programs across the development lifecycle

17K+
pipeline drug programs in the active discovery phase

177K+
company profiles

9M+
worldwide patents

1.3M+
records from 1,800+ contributing brokers

160+
detailed Disease Briefings

1,300+
SWOT analyses

1,600+
drug forecasts

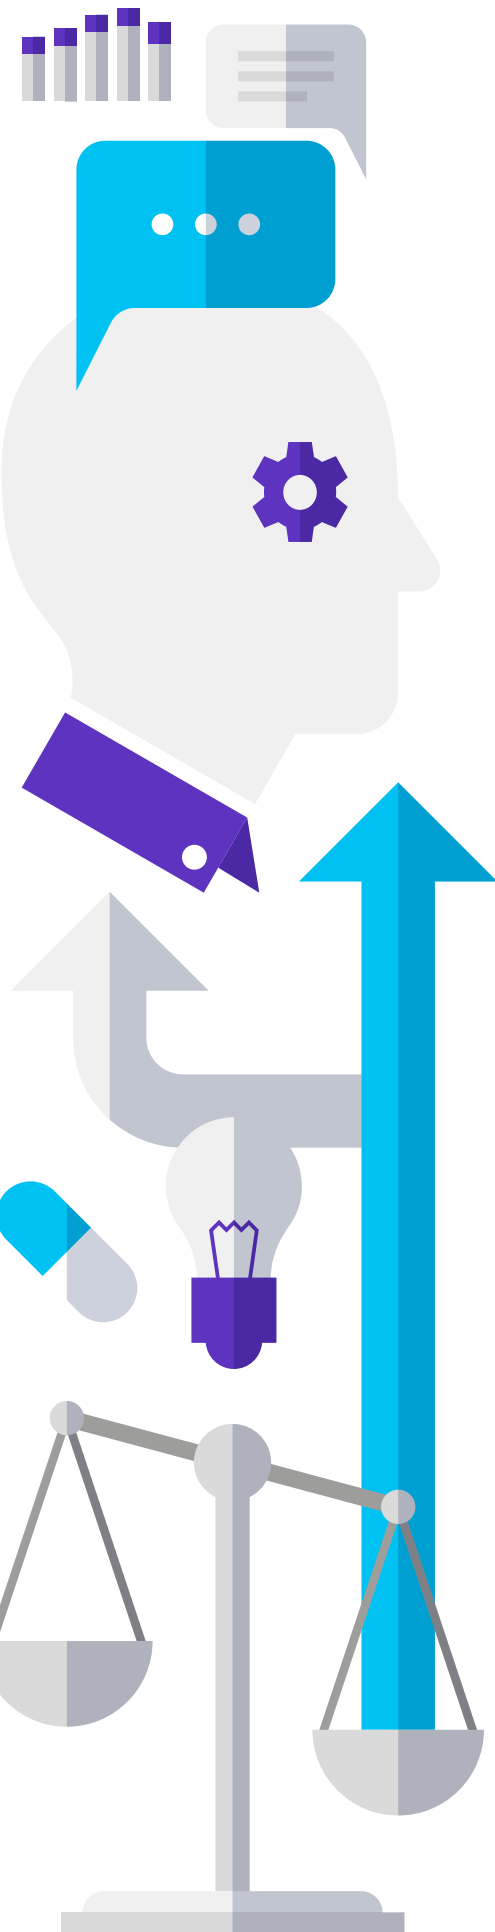

Expert team

650+
chemists, biologists and editors with a medical background

4-7+
years relevant experience to inform manual content curation

"I can put in different scenarios [in Cortellis] to find the deals that are comparable to another offer... The competitive data has to be very targeted. And these are things that would come up very easily using Cortellis."

Paul Resnick, Vice President & Chief Business Officer MabVax Therapeutics

Unlock the hidden insights in data

Perform due diligence, competitive analysis and portfolio planning. Identify new competitors sooner. Find and invest in early-stage assets before your competitors do with a data-driven foundation that is used by 88% of the top 50 global pharmaceutical companies.

Targeted intelligence

Focus on the information you need, including drug sales and forecasts, broker reports, event transcripts and venture funding.

Global coverage and access

Access support and analysis in 20+ languages and reports from 200+ conferences across 20+ countries.

Comprehensive searches

Find all the data you need with one search – organized, indexed and exportable to multiple formats.

Make better decisions and accelerate innovation
