InCites · Exciting Release

## New Feature - Author Position

Allows you to analyse the position of an author (or its affiliation) listed on a document published on or after 2008. Six new indicators are available in Researcher and Organisation entities to view the document counts and the % contributions in first, last and corresponding (or reprint) author positions.

JOURNAL CITATION REPORTS

Introducing new open access data in Journal Citation Reports

This new open access data will increase transparency around how much of the scholarly literature is published using the gold OA model, and how much of this content is being cited. This will help the research community better understand the contribution of gold OA content to the literature and its influence on scholarly discourse.

PEER REVIEW

How to write a peer review: practical templates, expert examples, and free training courses

Learning to write a constructive peer review is an essential step in helping to safeguard the quality and integrity of published literature. Read on for resources that will get you on the right track, including peer review templates, example reports, and the Publons Academy: our free, online course that teaches you the core competencies of peer review through practical experience (try it today).

RESEARCH SMARTER

Hunt down the right research papers: five tips every researcher should know

Finding the relevant research in your field is critical to a successful research project, and yet it can be one of the hardest, most time-consuming challenges for academics. This blog outlines the steps every researcher should take to leverage the citation network to complete an in-depth, comprehensive search for literature in Web of Science.

👍 Coronavirus (COVID-19) Resources

"Nothing in life is to be feared, it is only to be understood. Now is the time to understand more, so that we may fear less." - Marie Curie

Webinar: COVID-19 research efforts: Tips to run more effective search strategies – 27 May 2020

In this webinar, our international experts will share insights drawn from the history of Coronavirus research in the Web of Science citation network that can help you conduct research more effectively and in significantly less time.
